Promoting Sustainable Ecosystems

ISSUE
Conservation biologists work to protect biodiversity, partly by assessing which species are at risk of extinction and developing strategies to protect these species. These strategies include improving their habitat or removing them from the wild until their habitats can be restored. Governments also work to protect these species by enacting programs to protect ecosystems.

INSTRUCTIONS
A. Read "3.1 Government Action to Protect ..." / P.92-101
B. Answer Q.1,5 / P.97 and Q.1,4 / P.101
C. Read "3.2 Environmental Stewardship" / P.104-113
D. Answer Q.1,2 / P.109 and Q.4,6 / P.114
