

**USING THE MICROSCOPE**

- Carry the microscope with one hand on the arm, & the other on the base.
- Place the microscope gently on the table. Plug the microscope in, and turn on the power
- Rotate the nosepiece to the lowest power. Lower the stage.
- Place the prepared slide on the stage, under the stage clips.
- While looking from the side, raise the stage as close as possible to the objective lens, without touching it.
- While looking through the eyepiece, lower the stage using the coarse adjustment knob until the image comes into view.
- Use the fine focus knob to obtain the best image.
- If you need to use a higher objective lens, watch from the side as you rotate the nosepiece to ensure the lens does not touch the slide.

**STORING THE MICROSCOPE**

- Turn the objective lens to lowest power, lower the stage, & remove the slide.
- Turn off the light, unplug the cord, & wrap the cord neatly around the microscope.
- Use two hands to carry the microscope back to the storage area.
- Place the protective bag over the microscope before you store it away.

**PREPARING A WET MOUNT & STAINING A SAMPLE**

- Refer to P.544 of your text
